

Join Us for a Special “Trails for People and Wildlife” Program

Wednesday, March 25, 2020

6:30-8:00 PM

Tracy Memorial Library on Main St., New London

The goal of this program is to “get people outside to enjoy nature while minimizing impacts to wildlife.”

Trails are built for many purposes such as walking, running, biking, exploring cultural history sites, and other outdoor adventures we enjoy. Whatever the trail’s primary purpose, we should also be mindful of the inherent wildlife as we plan our trails. There are many considerations to take to ensure the most successful coexistence of people and wildlife in our plans.

Wildlife Ecologist Rachel Stevens, who works with NH Fish and Game, will present this program. It is intended to help landowners, conservation groups, and natural resource professionals interested in developing a thoughtfully located network of well-maintained trails to meet the goals for all.

The program is free and open to the public.

Refreshments will be served.

Please RSVP to Kristy at 526-6555 or kheath@ausbonsargent.org if you plan to attend.
