

Route: Cross Harding Hill Rd and follow the SRKG green and white markers straight. Follow the wide snowmobile trail past brooks, stone walls, and smaller connector trails. After a half mile, see Mt. Sunapee from a viewpoint before turning left onto a trail marked dead-end (applies to snowmobiles only). Continue until there is a wide clearing with large well-marked S4 signs. Take a sharp right turn onto a trail with SRKG blazes. Stay on SRKG at S5 then at S6 take a 200 ft detour for another view of Mt. Sunapee before following wide paths and SRKG markers. When SRKG forks as a small footpath stay on the snowmobile trail. Remain on the main trail by staying straight and then left at two close intersections. Take a right turn with SRKG markers and follow SRKG back to the parking lot. For a shorter option, turn right at the fork from the first viewpoint and take the connector trail until it meets a wide snow mobile trail. Turn right onto the snowmobile trail and follow it until there is a right turn with SRKG markers. Follow the SRKG signs to the parking lot. (Total length, short 1.25 miles, Long: 2.75 miles)
